

*Be an
inspiration.
Be Bayer*

At Bayer we're visionaries, driven to solve the world's toughest challenges and striving for a world where 'Health for all, Hunger for none' is no longer a dream, but a real possibility. We're doing it with energy, curiosity, and sheer dedication, always learning from unique perspectives of those around us, expanding our thinking, growing our capabilities, and redefining 'impossible'. There are so many reasons to join us. But if you're hungry to build a varied and meaningful career in a community of brilliant and diverse minds to make a real difference, there's only one choice.

Regulatory Science Manager - Africa (JO-2409-1080)

Role purpose

- // Coordinate and manage regulatory activities of all portfolios in country by following effectively the local Regulatory Science and Compliance activities.
- // Drive activities regarding the maintenance, defense and re-registration of existing BCS's products in country.
- // Actively represent BCS in front of manifold local external stakeholders (e.g., regulatory authorities), and pro-actively influences and shapes the regulatory environment

Key responsibilities and tasks

- // Direct and co-ordinate the evaluation and submission of all necessary regulatory data to gain and maintain product authorisations for (Bayer) portfolio products in country (s) at a timely manner with moderate autonomy
- // Give guidance and provide appropriate recommendations to the relevant regional and county teams; to secure timely products testing and registration communicate progress against key milestones for all applications and inform about key regulatory and policy developments to EMEA RA and business teams
- // Monitor changing national requirements for (Bayer) portfolio(s) and define country-specific strategies in support of EMEA RS deliverables while accommodating the changing requirements
- // Ensure regulatory compliance throughout the life cycle of Bayer's products by taking active role in stewardship initiatives

- // Be the primary interface of BCS regulatory organization with local regulators and officials dealing with regulatory matters Maintain and strengthen networks with local authorities, trade associations and scientists to support BCS strategies.
- // Actively contribute to outreach for policy, risk assessment and scientific matters. Represent BCS at relevant local industry associations and ensure BCS priorities are well defended in these settings
- // Ensure regional and global regulatory priorities and deliverables are well understood and respected during cross functional collaborations at local level.
- // Stay up to date with the latest developments in science, relevant legislation and guidelines at national level and ensure the information is shared with regional and global teams when relevant.
- // Develop close working relationship between global and regional RS teams.

Experience, Skills and Qualifications

- // MS in biology, chemistry, biology or agronomy (or related subjects).
- // Knowledge of relevant regulations and requirements for submission of registration applications and other regulatory dossiers.
- // Knowledge and understanding in agronomic industry business and competitive landscape.
- // Being able to operate with minimum direction from management
- // Function to accomplish pre-determined tasks.
- // Well-organized, able to work to deadlines
- // Eye for detail and for the big picture

// Strong IT (data management) skills
// Excellent communication skills (verbal and written)
// Ability to work successfully in a matrix environment towards measurable success
// Known to be pro-active and having good cross-cultural awareness; actively seeks input from others who have a diversity of thought and experience.
